 [LinkedIn](#)

I am a passionate MERN Stack Developer with a strong focus on building efficient, scalable, and user-friendly web applications. My experience spans designing dynamic frontends with React.js and developing robust backends with Node.js and Express.js. I enjoy creating seamless user experiences and crafting solutions that solve real-world challenges. With experiences in database systems like MongoDB and MySQL, I design well-structured databases that ensure performance and scalability. I'm constantly learning and thrive in collaborative environments where I can contribute and grow.

Experience

Software Engineering Intern

March 2023 - July 2024

- Designed and developed dynamic web applications
- Integrated third-party APIs to enhance application functionality and ensure seamless user experience
- Built robust backend systems using Express.js, php, with MySQL and MongoDB, implementing secure authentication and data management..
- Worked with REST APIs to fetch and display data dynamically..
- Contributed to codebase optimization and refactoring, improving overall performance.

Project - Devmeet (Collaboration Tool for developers)

September 2024 - Present

- Built a feature-rich platform enabling project teams to collaborate on code in real-time.
- Developed a dynamic dashboard showcasing community updates, achievements, and collaboration tools.
- Integrated a video conferencing module and task-tracking system.
- Tools Used: Next.js, Tailwind CSS, Express.js, MySQL, AWS

Skills

- Node.js
- Express.js
- Javascript
- Typescript
- RESTful API Design
- Tailwind CSS
- MySQL, MongoDB
- WebSockets
- Redux, React context, Zustand

Interests

When I'm not coding, I enjoy exploring advancements in React.js and Node.js, contributing to open-source projects, and participating in hackathons and tech conferences. I also enjoy listening to music, reading and trying out different foods
